Journal of Quantitative Spectroscopy & Radiative Transfer

List of Contents and Author Index
Volume 56, 1996

PERGAMON

JOURNAL OF QUANTITATIVE SPECTROSCOPY & RADIATIVE TRANSFER

Editor

Professor P. Varanasi, *149 Dana Hall, Marine Sciences Research Center, State University of New York, Stony Brook, NY 11794-5000, U.S.A. Email:* pvaranasi@ccmail.sunysb.edu

Associate Editors

Term ending 31 December 1996

A. Barbe, *Groupe de Spectrométrie Moléculaire et Atmosphérique, Faculté des Sciences, BP 347-51062 Reims Cedex, France*

K. V. Chance, *Harvard-Smithsonian Center for Astrophysics, 60 Garden Street, Cambridge, MA 02138, U.S.A.*

A. Chedin, *ARA/Laboratoire de Meteorologie Dynamique du CNRS, Ecole Polytechnique, 91128 Palaiseau Cedex, France*

A. L. Crosbie, *Thermal Radiative Transfer Group, Department of Mechanical and Aerospace Engineering, University of Missouri-Rolla, Rolla, MO 65401, U.S.A.*

J. Davis, *Plasma Dynamics Branch, Naval Research Laboratory, Washington, DC 20375, U.S.A.*

H. Fischer, *Institut für Meteorologie und Klimaforschung, Kernforschungszentrum Universität Karlsruhe, P.O. Box 3640, 7500 Karlsruhe 1, Germany*

A. Goldman, *Department of Physics, Space Science Laboratory, Rm 316, University of Denver, 2112 E. Wesley Street, Denver, CO 80208, U.S.A.*

J. W. Hovenier, *Department of Physics and Astronomy, Vrije Universiteit, De Boelelaan 1081, NL-1081 HV Amsterdam, The Netherlands*

R. W. Lee, *Department of Physics, University of California, Berkeley, CA 94720–7300, U.S.A.*

C. E. Siewert, *Department of Mathematics, North Carolina State University, Raleigh, NC 27695-8205, U.S.A.*

W. L. Smith, *CIMSS, University of Wisconsin, 1225 West Dayton Street, Madison, WI 53706, U.S.A.*

F. W. Taylor, *Department of Physics, Atmospheric, Oceanic & Planetary Physics, University of Oxford, Parks Road, Oxford OX1 3PU, England*

W. Whaling, *Department of Physics, California Institute of Technology, Pasadena, CA 91125, U.S.A.*

Term ending 31 December 1997

J. Ballard, *Rutherford Appleton Laboratory, Chilton, Didcot, Oxfordshire OX11 0QX, England*

R. Beer, *Mail Stop 183-301, Jet Propulsion Laboratory, California Institute of Technolology, 4800 Oak Grove Drive, Pasadena, CA 91109-8099, U.S.A.*

H. R. Griem, *Institute for Plasma Research, Energy Research Building, Room 1201F, University of Maryland, MD 20742-3511, U.S.A.*

N. Konjević, *Faculty of Physics, University of Belgrade, P.O. Box 550, 11001 Belgrade, Serbia*

P. Kunasz, *Joint Institute for Laboratory Astrophysics, University of Colorado, Boulder, CO 80302, U.S.A.*

J. LeNoble, *Laboratoire d'Optique Atmosphérique, Universite des Sciences et Technologies de Lille, Bâtiment P5, 59665 Villeneuve d'Ascq Cedex, France*

M. I. Mishchenko, *NASA-Goddard Institute for Space Studies, 2880 Broadway, New York, NY 10025, U.S.A.*

R. W. Nicholls, *Centre for Research in Experimental Space Sciences, York University, 4700 Keele Street, Downsview, Ontario, Canada M3J 1P3*

C. M. R. Platt, *CSIRO, Division of Atmospheric Research, Private Mail Bag 1, Mordialloc, Victoria 3195, Australia*

T. Ogawa, *Department of Earth and Planetary Physics, University of Tokyo, Hongo, Bunkyo-ku 113, Tokyo*

E. Oks, *Department of Physics, Auburn University, Auburn, AL 38849-5311, U.S.A.*

G. C. Pomraning, *UCLA-Engineering, 38-137H ENG4, Box 951597, Los Angeles, CA 90095-1597, U.S.A.*

W. L. Wiese, *National Measurements Laboratory, NIST, Washington, DC 20234, U.S.A.*

E. G. Yanovitskij, *Laboratory for Radiative Transfer Theory, The Main Astronomical Observatory, Ukrainian Academy of Sciences, 252127, Kiev-127, Goloseevo, Ukraine*

Term ending 31 December 1998

T. Ackerman, *Department of Meteorology, Pennsylvania State University, 503 Walker Building, University Park, PA 16802, U.S.A.*

G. Birnbaum, *National Institute of Standards and Technology, Materials Division, Bldg 223, Room 344, Gaithersburg, MD 20899, U.S.A.*

J. Cooper, *Joint Institute for Laboratory Astrophysics, University of Colorado, Boulder, CO 80309, U.S.A.*

R. G. Ellingson, *Department of Meteorology, University of Maryland, College Park, MD 20742, U.S.A.*

R. K. Hanson, *High Temperature Gasdynamics Laboratory, Department of Mechanical Engineering, Stanford University, Stanford, CA 94305, U.S.A.*

J. E. Harries, *Space and Atmospheric Physics Group, The Blackett Laboratory, Imperial College, London SW7 2BZ, England*

V. V. Ivanov, *Astronomy Department, Bibliotechnaya Pl. 2, Stary Peterhof, 198904 St Petersburg, Russia*

K. Lumme, *Observatory, P.O. Box 14, Tahtitorninmaki, FIN-00014, University of Helsinki, Finland*

R. D. May, *Jet Propulsion Laboratory, 4800 Oak Grove Drive, Pasadena, CA 91103, U.S.A.*

C. P. Rinsland, *NASA-Langley Research Center, Mail Stop 410A, Hampton, VA 23665-5225, U.S.A.*

L. S. Rothman, *Phillips Laboratory, Geophysics Directorate, Hanscom AFB, MA 01731-5000, U.S.A.*

K. Stamnes, *Geophysical Institute, University of Alaska, Fairbanks, P.O. Box 757320, Fairbanks, AK 99775-7320, U.S.A.*

W. Wiscombe, *Climate and Radiation Branch, NASA-Goddard Space Flight Center, Mail Code 913, Greenbelt, MD 20771, U.S.A.*

R. Zander, *Institute of Astrophysics, University of Liege, 5 Avenue de Cointe, B-4000, Liege-Cointe, Belgium*

Founding Editor

Professor S. S. Penner
UCSD, La Jolla, CA 92093-0310, U.S.A.

Publishing Office: Elsevier Science Ltd, Bampfylde Street, Exeter EX1 2AH, England [*Tel.* Exeter (01392) 51558; *Fax* (01392) 425370]. *Production Editor:* John Bailey (*e-mail* jd.bailey@elsevier.co.uk)

Subscription and Advertising Offices: *North America:* Elsevier Science Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A. *Rest of the World:* Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, England [*Tel.* Oxford (01865) 843000; *Fax* (01865) 843010].

Frequency: Published Monthly—Two volumes per annum.

Copyright © 1996 Elsevier Science Ltd

Subscription Rates: Annual Institutional Subscription Rates 1996: North, Central and South America, US$2133.00, Rest of the World £1341.00. Associated Personal Subscription Rates are available on request for those whose institutions are library subscribers. Sterling prices exclude VAT. Non-VAT registered customers in the European Community will be charged the appropriate VAT in addition to the price listed. Prices include postage and insurance and are subject to change without notice.

Back Issues: Back issues of all previously published volumes are available direct from Elsevier Science Offices (Oxford and New York). Complete volumes and single issues can be purchased for 1991–1995. Earlier issues are available in high quality photo-duplicated copies as complete volumes only.

PERIODICALS POSTAGE PAID AT NEWARK, NEW JERSEY. *Journal of Quantitative Spectroscopy & Radiative Transfer* (ISSN 0022-4073) is published monthly in 2 volumes of 6 issues by Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, UK. The annual subscription in the U.S.A. is $2133.00. *Journal of Quantitative Spectroscopy & Radiative Transfer* is distributed by Mercury Airfreight International Ltd, 10 Camptown Road, Irvington, NJ 07111-1105. POSTMASTER: Please send address corrections to *Journal of Quantitative Spectroscopy & Radiative Transfer*, c/o Elsevier Science Regional Sales Office, Customer Support Department, 655 Avenue of the Americas, New York, NY 10010, U.S.A.

List of Contents

NUMBER 1

M. Margottin-Maclou, F. Rachet, A. Henry, and **A. Valentin**	1	Pressure-induced line shifts in the v_3 band of nitrous oxide perturbed by N_2, O_2, He, Ar and Xe
J. Halenka and **W. Olchawa**	17	Analysis of the accuracy of computer simulations in calculations of the Stark broadening of hydrogen Ly_α, Ly_β and Ly_γ lines in plasmas
Ph. Rivière, A. Soufiani, M. Y. Perrin, H. Riad, and **A. Gleizes**	29	Air mixture radiative property modelling in the temperature range 10,000–40,000 K
J. J. Settle	47	Some exact solutions for coupled atmosphere–surface radiation models
V. Prahlad, S. M. Ahmed, and **Vijay Kumar**	57	Temperature dependence of photoabsorption cross sections of sulphur dioxide at 280–320 nm
J. M. de Regt, R. D. Tas, J. A. M. van der Mullen, B. van der Sijde, and **D. C. Schram**	67	Determination of transition probabilities for argon using Thomson scattering on an inductively coupled plasma
K. Smith, D. Newnham, M. Page, J. Ballard, and **G. Duxbury**	73	Infrared band strengths and adsorption cross-sections of HFC-32 vapour
David R. Farley and **Robert J. Cattolica**	83	Electron-beam fluorescence from the $A^2\Pi_u \rightarrow X^2\Pi_g$ and $B^2\Sigma_u^+ \rightarrow X^2\Pi_g$ transitions of CO_2^+
Jürgen Steinacker, Eike Thamm, and **Ulrike Maier**	97	Efficient integration of intensity functions on the unit sphere
Christopher D. Ball, J. M. Dutta, Thomas M. Goyette, Paul Helminger, and **Frank C. De Lucia**	109	The pressure broadening of SO_2 by N_2, O_2, He, and H_2 between 90 and 500 K
V. Dana, J.-Y. Mandin, M.-Y. Allout, and **L. Régalia**	119	Variation of the experimental conditions during the recording in FTS: effects on the determination of line intensities and collisional widths
Jir-Ming Char and **Jun-Hsien Yeh**	133	The measurement of open propane flame temperature using infrared technique

Antonella Amoruso, Luca Crescentini, Maria Silvia Cola, and Giorgio Fiocco 145 Oxygen absorption cross-section in the Herzberg continuum

Note

A. Poquérusse, S. Alexiou, and E. Klodzh 153 Hyperbolic trajectory parametrization for spectral line broadening calculations

NUMBER 2

A. S. Shlyaptseva, I. E. Golovkin, and U. I. Safronova 157 Spectra of dielectronic satellites due to 2→1 transitions and line polarization used for high-temperature plasma diagnostics

D. Benredjem, A. Sureau, P. Zeitoun, A. Klisnick, and C. Möller 167 Radiation reabsorption in Li-like recombination lasers

Johan Mellqvist and Arne Rosén 187 DOAS for flue gas monitoring—I. Temperature effects in the u.v./visible absorption spectra of NO, NO_2, SO_2 and NH_3

Johan Mellqvist and Arne Rosén 209 DOAS for flue gas monitoring—II. Deviations from the Beer–Lambert law for the u.v./visible absorption spectra of NO, NO_2, SO_2 and NH_3

Johan Mellqvist, Håkan Axelsson, and Arne Rosén 225 DOAS for flue gas monitoring—III. In-situ monitoring of sulfur dioxide, nitrogen monoxide and ammonia

E. Charro, I. Martín, and C. Lavín 241 Multi-configuration Dirac–Fock and relativistic quantum defect orbital study of triplet–triplet transitions in beryllium-like ions

C. J. Dai, S. F. Hu, and J. Lu 255 Multistep excitation of autoionizing states of neutral strontium

L. R. Brown and C. Plymate 263 H_2-broadened H_2 ^{16}O in four infrared bands between 55 and 4045 cm^{-1}

L. R. Brown and J. S. Margolis 283 Empirical line parameters of NH_3 from 4791 to 5294 cm^{-1}

G. Veres, J. S. Bakos, and B. Kardon 295 Energy levels and the vacuum ultraviolet spectrum of W VIII

Notes

M. A. Madkour 303 Radiation transfer in a spherical inhomogeneous medium by the projection method

M. Ç. Güleçyüz and C. Tezcan 309 The F_N method for anisotropic scattering in neutron transport theory: the critical slab problem

Brief Communication

K. Park, I. G. Nolt, T. C. Steele, L. R. Zink, K. M. Evenson, K. V. Chance, and A. G. Murray 315 Pressure broadening of the 50.873 and 83.469 cm^{-1} molecular oxygen lines

NUMBER 3

A. Ambirajan and D. C. Look Jr 317 A backward Monte Carlo estimator for the multiple scattering of a narrow light beam

Bingjing Su and Gordon L. Olson 337 Benchmark results for the non-equilibrium Marshak diffusion problem

J. J. Camacho, J. M. L. Poyato, A. M. Polo, and A. Pardo 353 Fluorescence of Na_2 excited by the 4545 Å line of the argon ion laser

L. B. Barichello, R. D. M. Garcia, and C. E. Siewert 363 The Fourier decomposition for a radiative-transfer problem with an asymmetrically reflecting ground

Christopher Godsalve 373 The inclusion of reflectances with preferred directions in radiative transfer calculations

J. Menart, J. Heberlein, and E. Pfender 377 Line-by-line method of calculating emission coefficients for thermal plasmas consisting of monatomic species

E. V. Sarandaev and M. Kh. Salakhov 399 Regularities in the Stark widths and shifts of spectral lines of singly-ionized aluminium

A. A. Vigasin 409 On the nature of collision-induced absorption in gaseous homonuclear diatomics

L. Hitzschke and S. Günter 423 The influence of many-particle effects beyond the Debye approximation on spectral line shapes in dense plasmas

Huaguo Teng and Zhizhan Xu 443 Rapid evaluation for dielectronic recombination rate coefficients of the H-like isoelectronic sequence

A. N. Valentyuk 447 A functional description of stochastic radiative transfer

Note

R. A. Krikorian and A. G. Nikoghossian 465 The Lagrangian formalism in the radiative transfer theory

NUMBER 4

Robert R. Gamache, Richard Lynch, and Linda R. Brown 471 Theoretical calculations of pressure broadening coefficients for H_2O perturbed by hydrogen or helium gas

M. W. Markus and P. Roth 489 Development of a quantitative ring dye laser absorption diagnostic for free SiH radicals

A. G. Nikoghossian and G. L. Israelian 501 The effect of strong scattering processes in the continuum on the stellar emergent energy distribution

G. Israelian and A. Nikoghossian 509 On Schuster's mechanism of emission line formation

A. Siems, J. P. Knauer, M. Kock, S. Johansson, and U. Litzén 513 Ar II branching ratios for spectrometer response calibration in the near vacuum-uv

M. Sakami, A. Charette, and V. Le Dez 517 Application of the discrete ordinates method to combined conductive and radiative heat transfer in a two-dimensional complex geometry

Richard W. Lee and Jon T. Larsen 535 A time-dependent model for plasma spectroscopy of *K*-shell emitters

A. Alonso-Medina 557 Transition probabilities for several infrared lines of Tl I and Ar I

J. P. Knauer and M. Kock 563 Experimental Stark broadening constants for Ar I, Ar II and Kr I resonance lines in the vacuum ultraviolet region

Chih-Yang Wu and Bo-Ting Liou 573 Radiative transfer in a two-layer slab with Fresnel interfaces

D. Bhanti, S. Manickavasagam, and M. P. Mengüç 591 Identification of non-homogeneous spherical particles from their scattering matrix elements

Christopher Godsalve 609 Accelerating the discrete ordinates method for the solution of the radiative transfer equation for planetary atmospheres

Notes

M. Vucelic and S. Mijovic 617 Regularization method and applications in spectroscopy

Ze-Qing Wu, Shi-Chang Li, and Guo-Xing Han 623 Opacity calculations for a non-LTE system with the three-temperature model

NUMBER 5

G. C. Pomraning 629 The variance in stochastic transport problems with Markovian mixing

A. Henry, D. Hurtmans, M. Margottin-Maclou, and A. Valentin 647 Confinement narrowing and absorber speed dependent broadening effects on CO lines in the fundamental band perturbed by Xe, Ar, Ne, He and N_2

Michael I. Mishchenko 673 Diffuse and coherent backscattering by discrete random media—I. Radar reflectivity, polarization ratios, and enhancement factors for a half-space of polydisperse, nonabsorbing and absorbing spherical particles

Kwo-Sen Kuo, Ronald C. Weger, and Ronald M. Welch 703 Bidirectional reflective boundary conditions and the analytical smoothing technique for the spherical harmonics method of radiative transfer

A. G. Trigueiros and C. Jupén 713 Weighted oscillator strengths for Si V spectrum

S. A. Astashkevich, M. Käning, E. Käning, N. V. Kokina, B. P. Lavrov, A. Ohl, and J. Röpcke 725 Radiative characteristics of $3p\ \Sigma, \Pi$; $3d\ \Pi^-, \Delta^-$ states of H_2 and determination of gas temperature of low pressure hydrogen containing plasmas

David R. Farley and Robert J. Cattolica 753 Multipole line strengths for linear Hund's case (a) molecules

Toshiaki Yokota and Kohji Honda 761 Macroscopic study of fine particle plasmas generated by the boat method

Y. Heiner, O. Stier, V. Türck, J. Waschull, B. Sumpf, and A. Ostermeier 769 Evolution strategies applied to least-squares curve fitting of spectroscopic data

M. V. Tonkov, N. N. Filippov, Yu. M. Timofeyev, and A. V. Polyakov 783 A simple model of the line mixing effect for atmospheric applications: theoretical background and comparison with experimental profiles

Note

A. Poquérusse, S. Alexiou, and E. Leboucher-Dalimier 797 Width functions for the perturbative dipole impact line-broadening theory with correct unitarity cutoff

Corrigendum I

NUMBER 6

A. A. D. Cañas 803 Concerning the effects of noise on the measurement of line strengths

H. Rieu, J. Escobar, N. A. Scott, and A. Chedin 821 SSM/T forward modelling using neural networks

J. Boissoles, F. Thibault, and C. Boulet 835 Line mixing effects in the 15 μm Q-branches of CO_2 in helium: theoretical analysis

J. C. Valognes and J. P. Bardet 855 Stark broadening of the 4471 Å He(I) spectral lineshape in dense cool plasmas ($1.0 \times 10^{17}\,cm^{-3} < N_e < 1.1 \times 10^{18}\,cm^{-3}$, 20,000 K $< T_e <$ 40,000 K)

Oleg A. Makhotkin 869 Analysis of radiative transfer between surfaces by hemispherical harmonics

M. Korek and H. Kobeissi 881 Analytical expression for the relative intensities of pure rotational Raman spectra

Siu-Chun Lee and Jan A. Grzesik 887 Coherent radiative transfer through multi-layer fibrous media

P. Victor Storm and Mark A. Cappelli 901 Radiative emission analysis of an expanding hydrogen arc plasma—I. Arc region diagnostics through axial emission

P. Victor Storm and Mark A. Cappelli 919 Radiative emission analysis of an expanding hydrogen arc plasma—II. Plume region diagnostics through radial emission

Note

A. B. Britan, P. V. Kozlov, V. A. Levin, S. Yu. Mitichkin, and V. G. Testov 933 Broadband spectroscopy on methane using shock tube and non-linear infrared spectrograph
